SUMMARY

Computer Science student with a strong foundation in JavaScript, React, and backend development. Experienced in building full-stack applications using Node.js and MySQL with API integration. Currently exploring Machine Learning and Generative AI concepts while working on data-driven projects and scalable software solutions.

WORK EXPERIENCE

Full Stack Web Developer Intern — iSoftZone

May 2025 – July 2025

- Developed features for a live CRM using React, Node.js, and MySQL
- Built responsive UI components and integrated REST APIs
- Implemented role-based workflows and improved UI/UX
- Collaborated with team using Git and pull requests

Sr. Marketing Associate — Codec Club SUAS

2025 – Present

- Led digital campaigns and improved engagement through data insights
- Managed cross-functional collaboration for events and outreach

Academics Head — Student Council

2024 – 2025

- Led academic workshops and student engagement initiatives for improved participation
- Managed event logistics, coordination, and documentation
- Collaborated with cross-functional teams to ensure smooth execution of events
- Strengthened leadership, communication, and organizational skills

EDUCATION

B.Tech in CSIT

2024-2028

Symbiosis University of Applied Sciences

- CGPA: 9.00

Senior Secondary (PCM)

2023-2024

Mount Litera Zee School, Ratlam

TECHNICAL SKILLS

- **Languages:** JavaScript, Java, Python
- **Frameworks:** React, Node.js, Express
- **Concepts:** Data Structures & Algorithms, OOP, REST APIs, DBMS
- **Databases:** MySQL, SQL
- **Tools:** Git, GitHub, VS Code
- **Currently Learning:** Machine Learning basics, Generative AI concepts
- **Certificates:** Web Development Certification — Internshala, Cyber Security Certification — Techobytes, Accenture Developer Job Simulation, Design Technology and Innovation - NPTEL
- **Soft Skills:** Analytical Thinking, Problem Solving, Effective Communication, Team Collaboration, Leadership

PROJECTS

- Real Estate CRM System : (React, Node.js, MySQL)
 - Built full-stack CRM with authentication and lead management.
 - Developed REST APIs and integrated frontend with backend.
- Student Marks Predictor: (Machine Learning)
 - Built a machine learning model to predict student marks using academic performance data using Python, Pandas and Scikit-learn
 - Performed data preprocessing, model training and probability analysis to generate prediction insights
- Women Safety App (Ongoing)
 - Developing platform with emergency alerts and real-time assistance.
 - Designing scalable backend architecture.
